

mlcoa Permanent Impairment (PI) Review Process.

Following the recent changes to SA WorkCover's peer review process on 30 March 2010, mlcoa is pleased to announce that we have trained staff and Doctors available to assist you.

mlcoa provides a wide range of accredited P.I. Assessors and our team adopts a collaborative quality assurance approach to the review of P.I. reports

Our internal processes involve the following:

mlcoa staff members have also completed the WorkCover PI training and are competent and experienced in carrying out our internal Quality Assurance program.

All PI reports will be reviewed by our staff prior to release to ensure AMA 5 and SA WorkCover compliance.

All mlcoa accredited medical specialists have gained the necessary experience over the last 12 months under the Peer Review system.

As an added safeguard for the future and to ensure our ongoing compliance with the WorkCover Guidelines, Dr Beata Byok (former Workcover peer reviewer) is available to review mlcoa reports prior to their finalisation and release, upon the request of our self insured clients. This service is available at the standard WorkCover fee.
