

# WORKPLACE INSPECTION TRAINING

## Summary (Course Outcomes):

- Participate in the identification, assessment and control of hazards and risks;
- Select or participate in the development of a suitable work place inspection checklist;
- Undertake a workplace inspection to identify workplace hazards;
- Review workplace inspections to evaluate the effectiveness of hazard management strategies;
- Describe the role and purpose of workplace inspections within their particular workplace.

## Course Description:

This training course outlines the role of workplace inspections in an effective hazard management system. Completion of this training and implementation of the workplace inspection process back at the workplace will assist individuals and organisation's to demonstrate they are taking reasonable steps to minimise health and safety risks to their workers and meet their legal requirements.
